

Kestrel Home Appliances - Operations Policy v4.1

Internal. Owner: D2C Operations.

§1 Scope

This policy covers warranty and Kestrel Shield claims submitted by authorised service centres, franchises and freelance technicians (service partners).

§4 Costs used for decisions

A genuine claim held for review delays the customer's repair; Kestrel issues goodwill worth **Rs 380** on average when that happens.

A fraudulent claim paid out costs the full claim amount. Blended cost of a service contact: Rs 260.

§5 Claim approval

Claims are submitted by the service partner with the product serial, a fault description and, where available, photos. Until 30 Apr 2026 every claim required partner inspection sign-off.

From 1 May 2026, claims under Rs 2,000 are auto-approved without inspection to cut turnaround time. Larger claims still need inspection.

The claims investigation desk can review at most **40 claims per month**. Investigation outcomes are recorded as fraud / not fraud; cases still open at export are undecided.

§6 Partner onboarding

Kestrel onboarded about 60 new service partners over the past year to cover tier-2 and tier-3 cities.

§9 Systems and timestamps

Until 30 Sep 2025 service and order operations ran on the legacy Zoho Desk instance. From 1 Oct 2025 everything runs on the Kestrel CRM. Legacy records were migrated in bulk; the *source* column says which system a row came from.

All timestamps in exports are Indian Standard Time as displayed in the CRM, **except** resolution events imported from the legacy Zoho event log, which were stored in UTC and were not converted during migration.

§10 Data handling

Customer and operational data may be shared with approved vendors for analysis. It must not be published, uploaded to public repositories or shared beyond the engagement team.
